- 2015 - Southwest & Midcontinent
- 2016 - Rocky Mountain
- 2016 - Texas
- 2017 - Northeast
- 2018 - Rocky Mountain

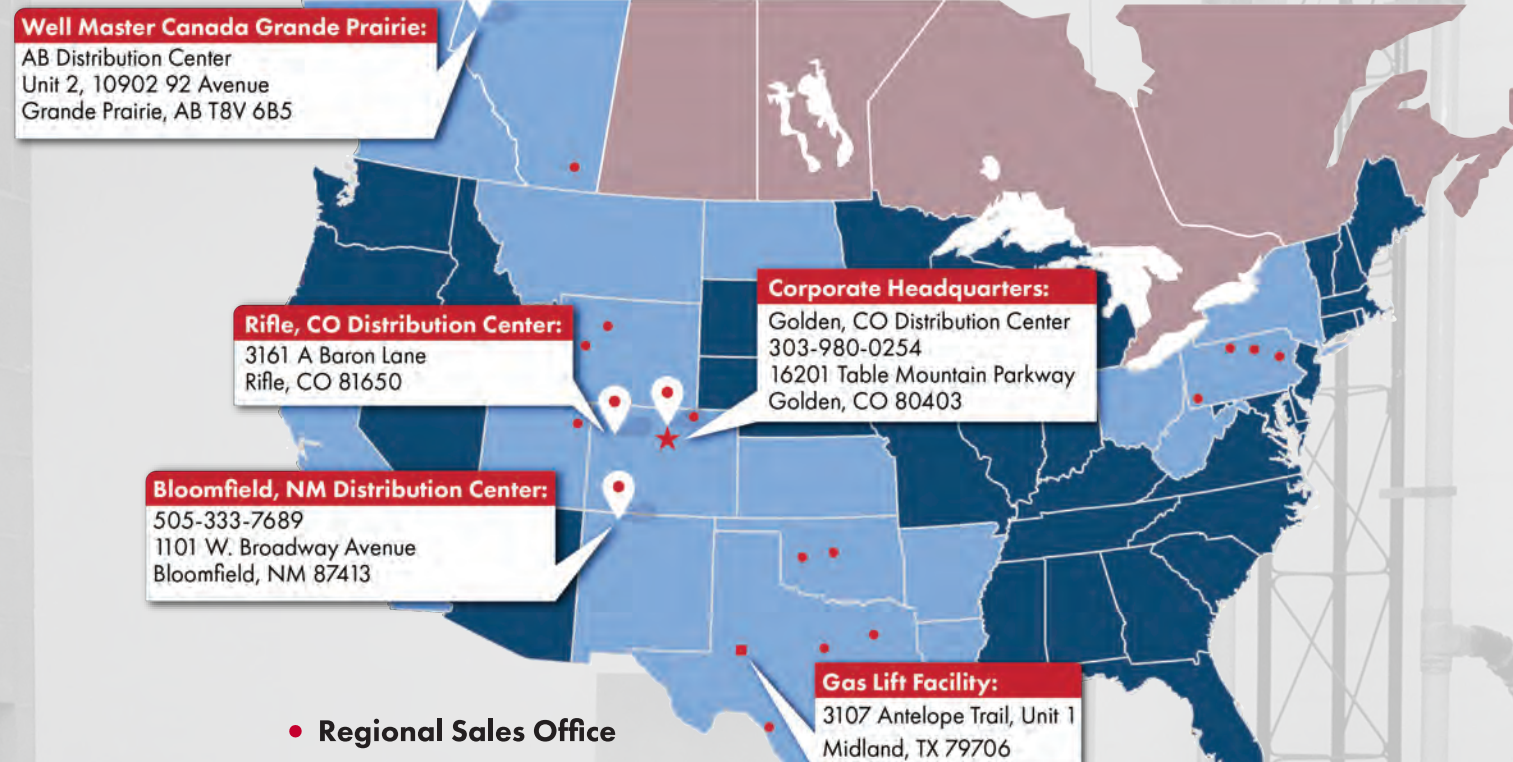

Well Master is focused on solutions for the entire life cycle of your oil and gas well. With no intervention or improper intervention, wells will underperform compared to the expected decline rate. Well Master's range of plungers are designed to optimize the well through its entire life. Our goal is to help you maintain production at optimum levels.

## Plunger Selection - Well Life Cycle Approach

# Global Reach

Contact Well Master today to find out how we can help optimize your oil and gas well production.
