**Well Master Announces The Launch of The TALON Ball and Sleeve**

**Golden, Colorado- June 17<sup>th</sup>, 2019** – The Well Master Corporation, headquartered in Golden, Colorado is proud to announce the launch of its newest continuous run plunger, The **TALON**, a Ball and Sleeve product. The **TALON** comes in two distinct variations, Rapid Fall (RF) and Turbulent Seal (TS) both are designed for fast fall rates and increased production. Application wise, The **TALON** is to be used in wells that are in the initial stage of liquid loading which produce high gas and liquid volumes.

The **TALON<sup>RF</sup> (Rapid Fall)** the fastest falling plunger on the market and creates more trips per day and falls against more flow than any other plunger and will increase production earlier on in the life of the well. The **TALON<sup>TS</sup> (Turbulent Seal)** has a fast fall rate but increases production through Well Master's Turbulent Seal Technology.

Each **TALON** is created with performance, innovation, engineering and advance technology in mind for a superior well optimization and production. A few of the innovative features of the **TALON** include variable groove design, a tapered nose and dual surface ball seal. The **TALON** is also reliable, and comes with advanced sealing technology specifically created to boost fall times while maintain a strong seal in the tube.

## **12" Talon<sup>RF</sup> falls:**

11% Faster than 4- Slot Screaming Eagle

5 % Faster than competitive ball and sleeves

## **12" Talon<sup>TS</sup> falls:**

8 % Faster than 4- Slot Screaming Eagle

2 % Faster than competitive ball and sleeve

Similar to other Well Master products the **TALON** is customizable by size, type, material and length to fit your unique well needs. For more information regarding the **TALON Ball and Sleeve** contact your local sales person or visit our product section to learn more.
