Forged Lubricators

The 5000 psi Unibody Lubricators

The 5000psi Unibody Lubricators are offered in a variety of configurations to meet your needs. All Unibodies are machined in Canada under the highest Quality Control measures. Designed in Canada for the rugged conditions of both the wellbore and weather conditions.

KEY FEATURES

- Body manufactured from one-piece billet
- Various flange or threaded port inlets and outlets
- Catchers are made from high-grade steel with Inconnell Spring and 17-4 Shuttles for long-life service.
- Factory pressure tested to 150% of working pressure rating.
- NPT Ports for:
 - Chemical Injection
 - Hydrostatic Testing

BENEFITS

- Manufactured in Canada to meet or exceed API-6A and API-11PL standards
- Full QA/QC, including:
 - Individual serial numbering
 - ABSA welding standards with full inspection reports (x-ray, heat treat, weld method)
 - Quality control documentation with:
 - 1.5x pressure test chart
 - Material traceability records
 - Inspection for fitment, alignment of flanges, internal drift ID
 - CNC manufacturing traceability
